CD6006 CD PLAYER

The new CD6006 is a fine-tuned version with even more specially selected components and new layout circuit compared to its CD6005 predecessor, the What HiFi "Best CD player under £500". We also added more rigid feet to further eliminate vibration. The oversized power supply feeds the digital and analogue circuitry of the player, where the high-quality CS4398 DAC converts digital signals to analogue, this is then 'pushed' to the gold-plated synch outputs by Marantz's own small signal amplifier, the HDAM-SA2. In addition, we have included a new remote that also controls the PM6006 amp. Altogether, the CD6006 is a match made in heaven for the music lover who wants nothing but the best performance at an attractive price, and it is also perfect for lovers of portable music, thanks to its iPod-digital connectivity. One more thing: the CD6006 features a newly developed, complex headphone amplifier with Headphone amp gain setting for a wider range of headphones.
